

Biography Hedrich

Dr. Jana Hedrich studied biology and finished her PhD 2011 at the Johannes-Gutenberg University Mainz. She did her PhD in the group of Professor W. Stöcker under the supervision of Professor C. Becker-Pauly, working on the fundamental physiological characterization of the meprin-metalloproteases alpha and beta. In 2011, she joined the group of Professor H. Luhmann as junior group leader at University Medical Center Mainz. There, she studied fundamental neurosciences and drug delivery across the blood-brain barrier in cooperation with Prof. Klaus Müllen and Prof. Tanja Weil. In 2017, Dr. Hedrich joined the group of Professor T. Weil as senior Postdoc leading the team “Applications for the Central Nervous System”.
